

This glass waste is disposed of to landfill by agreement with Retura

THE GLASS WASTE MUST NOT BE HAZARDOUS WASTE

COLLECTION POINT FOR GLASS WASTE FROM LABORATORIES

**The following criteria
must be met:**

- Glass waste must be clean and dry
- The waste must not contain any residues of chemicals or biological material
- There should be no chemical smell from the waste

If the glass waste is, or may be contaminated with chemicals, it must be disposed of in accordance with procedures for hazardous waste and not placed here.

The waste may be placed in cardboard boxes. These may have a plastic bag/inner bag. The boxes are then collected in pallets.
Gløshaugen: Realfagbygget rom DU4-147.

Kalvskinnet: Akrinn korridor TU2.101 underneath stairs.

In order to achieve good logistics, it is important that the pallet positions are filled up in order, ie position 1 is filled before position 2 is used, etc.

Pick-up of the full pallet is ordered via e-vaktmester.
