

# WASTE DISPOSAL

Glass waste is disposed of in the special container marked **GLASS** in corridor A103.

Big amounts of paper or cardboard is disposed of in container marked **PAPIR** in corridor A103.

Fire hazardous waste is disposed of in a red special container marked **ILDSFARLIG AVFALL** in corridor A103. Do not dispose of paper here, only paper towels with chemical waste.

Cannulas and pointy objects is disposed of in yellow special containers by the sink in B114 marked **INFECTIOUS WASTE**.

Chemicals/Special waste in containers, bottles etc. is disposed of in the red box in B117 marked **CHEMICAL WASTE**. This entails chemicals that cannot be disposed of in the sink (check Chemical Index) and packaging unfit for residual waste. Empty bottles/containers that have contained phenol, formalin etc. has to be open and put in the fume cupboard for venting, and then afterwards disposed of in the chemical waste box.

Residual waste is disposed in the bin on the floor
